Principal Decisions

We define principal decisions as both those that are material to the Group, but also those that are significant to any of our key stakeholder groups. In making the following principal decisions the Board considered the outcome from its stakeholder engagement as well as the need to maintain a reputation for high standards of business conduct and the need to act fairly between the members of the Company.

During the year, the Board has made a number of ‘principal decisions’ in the main in response to the onset of the Covid-19 pandemic and the resulting social distancing measures, health and safety regulations and social and economic disruption. A description of these principal decisions is provided below.

Principal decisions taken in the year to 31 December 2020

Orderly shutdown of site operations

- From the start of the outbreak of the virus in the UK, the Group closely followed Public Health England’s guidance including implementing social distancing measures to ensure the safety of its customers, communities and workforce.
- Following enhanced Government and Public Health England guidance that was issued on Monday 23 March, the Board decided to take further measures from Thursday 26 March including:
 - Closing all of the Group’s sales offices, regional offices (with only a skeleton staff to facilitate the wider workforce working from home);
 - Commencing an orderly shutdown of its sites with only essential work taking place focusing on making partly built homes safe and legally completing homes where failure to do so would have left customers in a vulnerable position; and
 - Performing emergency customer care works only.
- The decision, and the structure of the Group’s closure, was guided by the Board’s long standing key priority of ensuring the health, safety and wellbeing of its customers, communities and workforce.

Phased restart to site operations

- In the period from 25 March 2020, the Group worked closely with its colleagues, sub-contractors and suppliers, in developing and testing a range of new Covid-secure operating protocols, in compliance with all relevant regulations, including the Construction Leadership Council’s Standard Operating Procedures.
- Once completed, the Board agreed a phased restart to work on-site with effect from 27 April 2020, taking into consideration:
 - the clear guidance issued by Government in April 2020, stating that it sees construction as a vital element of the UK economy and that where sites can comply with the Construction Leadership Council’s Standard Operating Procedures they should continue to operate, and,
 - The stringent Covid-secure operating protocols that the Group’s Health, Safety and Environment Department had tested and developed.

Continuous employment for all colleagues without recourse to Government assistance

- Throughout 2020, the Board decided to retain all of its colleagues on full basic pay, irrespective of whether or not any disruption in site operations impacted them, without any recourse to Government assistance. During the site disruptions in March and April 2020, approximately 30% of our colleagues were stood down from site operations.
- In assessing this decision, the Board placed great importance on supporting all colleagues through the crisis period and on ensuring that their skills were retained within the business into the recovery, considering this to be in the long-term interests of all stakeholders.
